This book may not be lent, resold, hired out or otherwise disposed of by way of trade in any form of binding or cover other than that in which it is published, without the prior consent of the Publishers. Post-transaction elements For example: Availability of spares What are the in-stock levels of service parts? In the past most airlines having bought an engine would assume responsibility for the servicing of that engine and holding the necessary inventory of spare parts. Caterpillar has for many years focused on developing not just its manufacturing. The achievement of competitive advantage through service comes not from slogans or expensive so-called customer care programmes, but rather from a combination of a carefully thought-out strategy for service, the development of appropriate delivery systems and commitment from people, from the chief executive. Instead, the need to create value delivery systems that are more responsive to fast-changing markets and are much more consistent and reliable in the delivery of that value requires that the supply chain as a

whole be focused on the achievement of these goals. Start on.  
Companies who occupy that position have offers that are distinctive in the va  
tendency to the concentration of buying power is being  
accelerated as a result of global mergers and acquisitions.
